**Subject:** Dominion Possum Point power station - Mechanical dredging work  
**Attachments:** Possum Point mech dredge - 1 page summary.docx; Possum VDGIF Eagle Consult -Haul Route.pptx

David,

As per our conversation today, I have provided attached a summary level Scope of Work for the dredging at Possum Point station. We have chosen to mechanically dredge/excavate the lower pond because we believe that hydraulic dredging into the upper pond will add water such that expedited dewatering and closure plan within our time available would be at risk.

Also be advised that we have determined that Dominion will bid the work immediately, and a more complete bid solicitation will be in your hands by Monday, so advise your men that the site visit Monday should support a bid level submission. Of course, revisits are acceptable as well. The Scope of Work summary, as well as a site plan aerial showing the truck route and eagle nests, is attached.

Thanks David for the support of TransAsh.

I will meet your men at the Possum Point Station security post, 19000 Possum Point Road, Dumfries, VA 22026, on Monday 3/16 at 1400 hrs.

**Bob Jackson**
